Experience & Projects

Building and construction platform   2023
worked on this project by using laravel with team leader to make this platform responsible for hndle documents between engineering office and contractor and real estate owner features like login with nfaz app in saudi arabia, payment gateway with mda you can check this web app throw this link

bonian.sa/ar

Educational Platform   2022
Worked on this project with my friend I responsible for backend and he was responsible for front end and project completed and on host now
this platform specialy for chimestry teacher its enrolled student
student payment student watch videos and solve question every student can enrolled from one device only has admin panel for teacher to see who watch videos who solve exam who is online and see result and more

E-Commerce web site   2021
Worked on this project to make purchase easy and for user experince to be good the feature of this project is to see all product and add product to cart and complete order and the way order will deliver to you every seller can add his product to our store

Sales of point   2020
I worked on this project to solve problem to sweet shop he faced problem monthly gard for stock and the items that out of stock not countable with accuracy so i created some equation and make it with php and the problem solved with the best result

Automated Examination System   2019
this is my graduation project it was made with python not php but i was responsible for for an important part of this project i was responsible for make store data for student that comes from scanned paper to store in database and make quieries on it
